Operator Compliance & Training Management

QR-enabled digital training records, instant compliance verification, and role-based assessment — zero untrained operators on the floor.

ROLE-BASED ACCESS LEVELS

The problem: Verifying an operator's training status the manual way — a phone call to QHSES — takes 45 minutes. Multiply that by every contractor and operator on a large site, and compliance verification becomes something that happens after an incident, not before one.

WHAT'S INSIDE

Core capabilities

Six ways Compliance Platform solves this on day one.

QR-Code Identity Cards

Every operator is issued a QR-coded ID card; scanning it at any point instantly displays training records, license validity, authorisations and offences.

Audit-Ready Reporting

Daily, weekly and monthly training logs; certified vs pending operator counts; a full audit trail per operator; compliance heat-maps by department, shift and contractor.

Role-Specific Online Assessment

Randomised question banks, online and offline exam modes, with supervisor approval and video-evidence upload for offline assessments.

No-Migration Integration

Connects to HRMS, SAP HR and existing QHSES training databases via REST API — no data migration required, live in 4 weeks.

4-Role Access Control

Administrator (full system control), Auditor (spot-check via QR scan), On-Field Validator (skill feedback + video upload), and Operator (self-service training view).

Automatic Compliance Enforcement

Unauthorised operators are auto-blocked before starting work; the system flags training gaps, expired licenses, and PTW non-compliance in real time.

Why IIIOT Infotech

CMMI Level 3 process maturity, 50+ enterprise clients, and a full product suite owned end to end — no third-party stitching. Most engagements go live with a working pilot in 4-8 weeks, not a multi-quarter rollout.
